

TRANSNET SUPERBOX BD

POWDER FOR CAR CLEANING LOW DENSITY

DESCRIPTION

TRANSNET SUPERBOX BD is an alkaline low density powder for car body cleaning .

The presence of surfactants enables it to effectively remove all soils. Thanks to its sequestering power, it prevents the formation of limestone (index of sequestration: 50 ° f to 10g / l).

TRANSNET SUPERBOX BD creates sufficient foam to clean the vehicle in a controlled and not abundant manner.

Dissolving the powder is easy in warm or hot water due to its composition of atomized powders. The dosage is facilitated and optimized and the effectiveness is enhanced.

APPLICATION/INSTRUCTIONS FOR USE

TRANSNET SUPERBOX BD is ideally suited for cleaning passenger car bodies.

TRANSNET SUPERBOX BD is used in high pressure stations.

At a concentration of 10 to 12 g / min.

For maximum results, it is recommended to apply it at a temperature between 40 and 50 ° C.

Professional product: it is strongly advised to avoid contact of the pure product with the skin, and to leave it out of the reach of the children.

CHARACTERISTICS

Aspect:powder
pH at 10 g/l:10.5 +/- 0.3
Density at 20°C:0.55 +/- 0.01 g/cm³
Colour:white

The surface agents used in the design of our products comply with biodegradability criteria as defined in EC regulation No. 648/2004 relating to detergents.

PACKAGING

Bag :25 kg

STORAGE

Store the product in a dry location in its original packaging.
